expertise, from the team that listens

Our **approach** is simple.
We put the **customer first**.

Technology Solutions for Work Product Management

Since 2005 Tiger Eye have been delivering the highest levels of service to firms worldwide.

Why Tiger Eye?

Professional services firms deliver trusted advice to their clients and Tiger Eye know you expect the same level of service from your suppliers. If you are considering installing a document management system, upgrading your existing system or looking for better support, we believe we offer unrivalled levels of expertise and service.

Service means partnership

We're proud of the partnerships we have formed with major names in the legal, accounting and professional services arenas.

By listening to our clients and identifying their key challenges we are able to build systems that work for them.

Best of breed solutions

Tiger Eye have had a close working relationship with iManage from the outset and we have built similarly

strong ties with many other software vendors including Mimecast, Docscorp, DocAuto, Tessian and Workshare.

We have developed both our own suite of integrated software tools which enhance the solutions we provide, and also a knowledge management product (Blueprint) which helps firms create, organise and share knowledge throughout their organisation.

So whether you need a new document management system,

help with your existing system, or bespoke software development, Tiger Eye have the knowledge, the experience and the tools to build you a great solution.

Security

Building a system that is fit for purpose is more than a technical exercise. Tiger Eye bring real world experience of installing systems which meet the exacting security standards required by today's professional services clients.

Meet the team

Our team have knowledge and experience gained from years of working in partnership with legal, accountancy and professional services clients.

Led by Dave Wilson, Julie Wilson and David Bullock, the whole team understand how important your systems are to your business and strive to deliver the highest levels of service.

When clients call our support team they always get through to a qualified systems engineer and the call is always actioned.

We're a close-knit group of experienced people who are genuinely passionate about producing great results.

blueprint.

Blueprint Knowledge Management

We knew from our clients that there was a need for a knowledge management workflow solution.

So we built Blueprint, a knowledge management tool specifically designed for law firms.

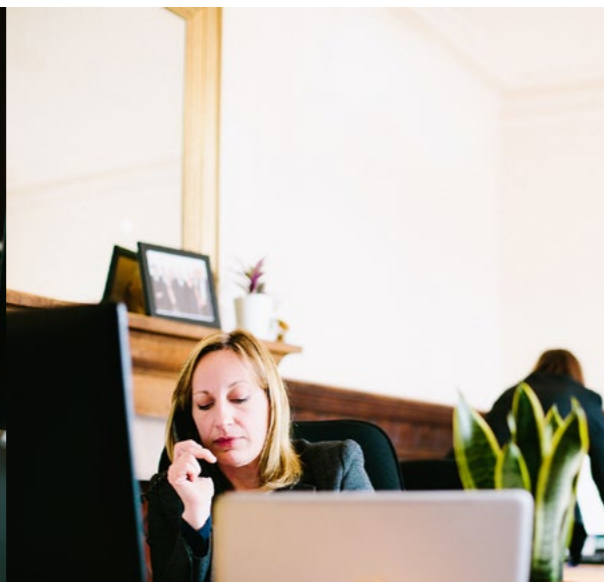

Blueprint offers law firms a fully featured KM system that works seamlessly with iManage.

For more on Blueprint, call us on 01603 293500 or email: enquiries@tecblueprint.com
